Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/27/2007 has been entered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation in claim 3 of the draw-out rail comprising "a locking projection" pointing in the direction of the other draw-out rail must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 3637

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-16, 21-22, and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, the preamble clearly indicates that a subcombination is being claimed, i.e., "a device for connecting a draw-out rails (5) of a drawer guide (5,6) to a drawer and releasing said connection in a simple manner without much force, comprising..." This language would lead the examiner to believe that the applicant intends to claim only the subcombination of a device, the draw-out rail of a drawer-guide and a drawer being only functionally recited. The problem arises when the draw-out rail is positively recited within the body of the claim, such as, "a two –armed lever (13) structured and arranged to release said catch (11) from interlocking position with the draw-out rail (5)". In this case, there is an inconsistency within the claim. The preamble indicates subcombination, while in the body of the claim in at least one instance there is a positive recital of structure indicating that the combination of a device and draw-out rail is being claimed. The examiner

Art Unit: 3637

cannot be sure if applicant's intent is to claim merely the device or the device in combination with a draw-out rail. Applicant is required to clarify what the claim is intended to be drawn to, i.e., either the device alone or the device in combination with the draw-out rail, and the language of the claim be amended to be consistent with the intent. For the purpose of this examination, the examiner is considering that the claims are drawn to the combination. Claim 1, lines 15-16, "said locking catch" lacks antecedent basis, thus indefinite. Claim 11, since it depends on claim 2, the recitation "wherein each draw-out rail" lacks antecedent basis; should applicant elect to amend the claim to overcome this rejection, claim 11, line 1, "wherein each draw-out rail" should be "further comprising a plurality of draw-out rail (5), wherein each draw-out rail".

Allowable Subject Matter

5. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. Claims 2-16, 21-22, and 24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
